

Fenix Industries® presents ...

the

AVATAR®

the thinnest and brightest exterior light bar series in the industry

Full Aluminum Housing.

For the Avatar, no expense was spared. Sturdy and tough, this light bar is entirely made of aluminum, end caps included. This tough exterior light bar series can withstand all forms and elements of environmental impact, without oxidation.

Aesthetics do matter.

Sleek and Slick, the Avatar light bar is the thinnest in the industry. Standing at 0.95" tall, this exterior light bar fulfills all stealth applications; that is until its turned on.

Full 360 ° Lighting

For the Avatar, no corners were cut. Literally. This exterior light bar boosts full 360 degree lighting and not just any lighting but the award winning, Phillips 4-watt Rebel. The maximum output for the 47" Avatar light bar exceeds 32,000 lumens.

Available Lengths:

- 27"
- 37"
- 47"
- 57"

Fully Adjustable.

Installer friendly. The Adjustable feet provide a range of flexibility and customization when mounting the light bar on to any vehicle, and the modular design allows for LED modules to be easily exchanged.

Customization. Have it your way.

From take downs to all possible color arrangements, the Avatar light bar can be fully customized to individual or department specs.

Fuel Efficient.

The sleek build of the Avatar exterior light bar series allows for exceptional fuel efficiency. With three times the fuel efficiency of leading competitor light bars, the aerodynamics of this light bar will astound you.

47" Maximum Output: 32,800 Lumens

After more than two years of research and development, Fenix Industries is proud to present the Avatar exterior light bar series, featuring pure, unobstructed 360 lighting with 7, 2-led modules in each corner. The fully customizable light bar is completely constructed out of aluminum. The expected release date of sale for the light bar is **January 2012**.

Dealer pricing to be released shortly before date of sale.
