Quantum 2.0

Introduction to Quantum 2.0

Welcome back to Feniex University. My name's Hamza Deyaf, and today I'm really excited to walk you through this revolutionary Quantum Family Series. I'll cover everything you need to know about the Quantum product line from programming to configurating, unlocking, and servicing your product. As you've seen in the Summit 2024 Keynote, we have added green to the entire Quantum Family Series from light bars ranging from 60 inches to 49 and 44 inches to many bars in three sizes from 14 inches to 18 and 27 inches to a light stick family from a rocker panel to an 800 600 and a four head module series to both spoiler and pillar mounts. Of course, our arrow boards come in a single size, along with a split-size version and our undercover interior light bar series. Stay tuned as we cover every single product in this series. I hope you find this information enjoyable and informative.
