DESCRIPTION:

The Fenix 6X Switch Box is a streamlined control solution designed for managing complex lighting systems with ease. Featuring five on/off switches and one momentary switch, the 6X offers control over individual light groups such as grille lights, work lights, lightbars, or traffic advisors—each with a 10-amp capacity for reliable power management in demanding applications.

- Compatible with any 100-watt siren amplifier
- Robust durability
- Backlit LED buttons when button(s) activated
- Includes U-bracket for mounting
- Waterproof rating: IP67
