DESCRIPTION:

The SynQ-S is a full-size vehicle controller built for operators who need clear, direct access to their most important functions. Featuring 22 backlit buttons and an integrated slide switch, it provides fast, intuitive control with five selectable button colors for quick mode identification. The system powers on in just one second, giving users instant access to lighting, siren, and auxiliary functions the moment the vehicle is active. A 200W dual-tone siren, 15+ programmable siren tones, and over 20+ audio commands are included through the paired SynQ Relay.
