Fenix Product Copyrights This price list and the mentioned Fenix products include or describe copyrighted Fenix material. Laws in the United States and other countries preserve for Fenix Industries and its licensors certain exclusive rights for copyrighted material, including the exclusive right to copy, reproduce in any form, distribute and make derivative works of the copyrighted material. Accordingly, any copyrighted material of Fenix and its licensors contained herein or in the Fenix products described in this Price List may not be copied, reproduced, distributed, merged or modified, transmitted, transcribed, stored in retrieval system or translated into any language or computer language, in any form or by any means, without prior written permission of Fenix Industries, Inc. Fenix and the stylized Fenix logo are registered in the U.S. Patent & Trademark Office.

SAFETY REGULATIONS & WARRANTY

Safety Regulations

The following provides all the information necessary to safely operate the previously listed products of Feniex Industries, Inc. Please read this manual thoroughly before installing or operating your new product in order to prevent any damage or injury. Failure to follow the listed instructions in this manual may result in damage to your products or personal injury.

- Proper installation of this product requires good knowledge of automotive systems, electronics and procedures.
- Please guarantee all vital components of the vehicle are not in danger of being damaged by drilling holes necessary for installation. Check all sides of the mounting surface before drilling any holes into the vehicle.
- Do not install this product in any way that interferes with the deployment of the air bag. Doing so may damage the effectiveness of the air bag and can lead to serious personal and vehicle injury. The installer will assume full responsibility of proper installation of the new unit.
- Please clean the mounting surface before installation of the unit when using tape, brackets, magnet, Velcro or suction cups.
- The product's ground wire must be connected directly to the Negative (-) battery post for effective use of the unit. Please follow all wiring guidelines provided to guarantee long lifespan and productivity. Failing to follow these instructions may result in damage to the product.

Warranty

Feniex Industries, Inc. warranties to the original purchaser that all our products shall be free from defects in material and workmanship. Feniex Industries' speakers, sirens, rocker panels, controllers, and illumination products are warranted for two (2) years from the date of original sale. All Quantum® and Quantum® 2.0 products are warranted from the date of first activation. All other products are warranted for five (5) years from the date of original sale.

If a warranty problem occurs, please contact customer support at 1.800.615.8350 or visit the website at www.feniex.com/support.

If the product needs to be returned for repair or replacement, call our customer support line to receive a return merchandise authorization number.

Operational times are from 9 a.m. to 6 p.m. central time, Monday through Friday. Please do not send in product without contacting support first for an RMA number.

Service After Expiration

Feniex Industries will still provide service for all products after the expiration of the warranty. In some instances it may be necessary for the product to be shipped, freight prepaid, and insured for loss or damage to Feniex headquarters.

Warning! Utilizing non-factory screws and mounting brackets may result in loss of warranty coverage.

Copyright

This instruction manual and the Feniex products described in this instruction manual may include or describe copyrighted Feniex material. Laws in the United States and other countries preserve for Feniex Industries and its licensors certain exclusive rights for copyrighted material, including the exclusive right to copy, reproduce in any form, distribute, and make derivative works of the copyrighted material. Accordingly, any copyrighted material of Feniex and its licensors contained herein or in the Feniex products described in this instruction manual may not be copied, reproduced, distributed, merged, or modified in any manner without the express written permission of Feniex Industries, Inc.

Feniex Product Copyrights

The products described in this document are the property of Feniex Industries, Inc. It is furnished by express license agreement only and may be used only in accordance with the terms of such an agreement. Products and documentation are copyrighted materials. Making unauthorized copies is prohibited by law. No part of the product or documentation may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language or computer language, in any form or by any means, without prior permission from Feniex Industries, Inc.

WARRANTY	2 Years

SPECIFICATIONS

TYPHOON 200W **HANDHELD**

CONTROLLER	2.65" x 4.78" x 1.2"
RELAY	8" x 6.25 x 2.44"
VOLTAGE	11-16VDC
MAX CURRENT	80 Amps
AMPS PER OUTPUT	5 Amps @ 13V
EXTERNAL FUSE	125% Circuit Load
INPUTS	8 Positive
OUTPUTS	8 Grouped Outputs
BUTTONS	6 Buttons
WARRANTY	2 Years

Important! Recommended to use a power disconnect device to disconnect the system from vehicle battery. Failure to do so can deplete the vehicle's battery.

AMPS PER OUTPUT

Each output is rated at 5 amps. Combined group outputs can support up to 8 amps.

Important! Each output can supply 2 amps maximum and a combined maximum of 8 amps per block. The output will turn off when this is exceeded. If this occurs, you can tie multiple outputs together to get the desired current. Note, the total maximum current when all outputs are used cannot exceed 60 amps.

CONFIGURATION INPUT RECORD

BUTTON	OUTPUTS	ASSIGNED TO
Button 1	Outputs 1-4/Quantum Input 1	
Button 2	Outputs 5-8/Quantum Input 2	
Button 3	Outputs 9-12/Quantum Input 3	
Button 4	Outputs 13-16/Quantum Input 4	
Button 5	Outputs 17-20/Quantum Input 5	
Button 6	Outputs 21-24/Quantum Input 6	
Input A	High Beam Override (1-8)	
Input B	Outputs 25-28	
Input C	Outputs 29-32/Siren Speaker 2	
Input D	Siren Speaker 2 Tone Select	
Input E	Air Horn/Horn-Ring	
Input F	Hands-Free	
Input G	Park Kill	
Input H	Radio Rebroadcast/ Speaker 1 Output Only	

▲ CONFIGURATION INSTRUCTIONS

■ Buttons

1. Buttons 1 & 2 can be converted into wig wag with alternate patterns. Outputs 1-4 are combined and will alternate flash patterns with Outputs 5-8.
2. Buttons 3-6 have their own assigned outputs. A single output can handle up to 5 amps with a combined ports of 7.5 amps.

■ Inputs

1. Input A (High Beam Override): When receiving 12VDC+, Outputs 1-8 will activate and turn on.
2. Input B: Activates Outputs 25-28.
3. Input C: Activates Outputs 29-32 and Siren Speaker 2.
4. Input D (Siren Speaker 2 Tone Select): To change Siren Speaker 2, first activate Input C, then momentarily apply 12VDC+ into Input D to cycle to the desired tone.
5. Input E (Air Horn/Horn-Ring): When 12VDC+ is applied with no siren tone activated an air horn will sound out.
6. Input F (Hands-Free): When activated, use Input E to enable and disable the siren tone. Press once to activate HF and x3 to turn off. A single activation will cycle through each siren tone when HF siren is activated.
7. Input G (Park Kill): When an active siren tone is on applying 12VDC+ will silence any siren tone.
8. Input H (Radio Rebroadcast): Connect your two-way radio's external speaker for radio rebroadcast.

CONFIGURATION INSTRUCTIONS

Power-Up Functionality

Auto Power-Up: Keypad activates upon starting vehicle

Manual Power-Up: Keypad remains off until manually activated using power button.

Important! To use this functionality, the Red Wire must be connected to an ignition switched circuit capable of providing current for all 6 outputs and the siren amplifier.

1. Press the "On/Off" button to turn the system off.
2. Press and hold the power button for 3 seconds. A beep will sound when programmed.
3. You have now Toggled the "Auto-On" function. To reverse the functionality, repeat the steps above.

POS.	FUNCTION	ACTION
OFF	Siren Off	N/A
M1	Ramp Up/Down	Manual [Momentary]
M2	Ramp Up/Stop	Manual [Momentary]
HF	Continuous	Manual x1 & Manual x2
T1	Continuous	Manual to switch tones
T2	Continuous	Manual to switch tones
T3	Continuous	Manual to switch tones

▲ CONFIGURATION INSTRUCTIONS

■ Setting Siren Buttons to Momentary

Only the buttons highlighted in red (above) are siren functions.

1. With the system powered off, press and hold the desired button you wish to program as momentary.
2. Continue holding the button while holding down the "On" button until you hear a beep.
3. The button is now set as momentary. To reverse the function, repeat these steps.

■ Park Kill

Park-Kill is used to deactivate any activated standard siren tone. Park-Kill does not deactivate audio recordings. The Park-Kill wire can be connected to your vehicle's overhead light, door trigger, or park-signal so that the siren is disabled when the door is opened or the vehicle is shifted to park.

■ Radio Rebroadcast & Microphone

When either Radio Rebroadcast or the Microphone is activated, any activated tone, standard siren tone or audio recording gets deactivated.

■ Microphone Volume

To adjust the microphone volume, locate the mic volume dial (see diagram) on the side or top of the controller. Use a small phillips-head screwdriver to adjust the volume.

■ Output Buttons *(Handheld model only)*

A siren tone can be assigned to any one of the 6 output buttons to enable along with your activation outputs. To add or remove a siren tone, activate a button (1-6) and press the Siren Tone Select Button until you reach your desired outcome.

To disable an Output Button that is activating a siren tone, keep cycling through tones until the siren turns off.

▲ MOUNTING INSTRUCTIONS

■ Typhoon Handheld Mounting

Important! Make sure not to damage any vital parts of the vehicle or mounting surface. Do NOT mount anywhere that interferes with the vehicle air bag coverage.

1. Place the Handheld nest against the intended mounting surface.
2. Mark the areas where the mounting holes will be drilled. If the mounting surface is part of the vehicle, make sure no vital components could be damaged by the drilling process.
3. Drill two 0.16" mounting holes on the mounting surface, making sure no vital components of the surface are damaged.
4. Using customer provided screws, secure the Typhoon Siren to the mounting surface.
5. Place the Typhoon Handheld Controller into the clip to hold the unit when not in use.

▲ MOUNTING INSTRUCTIONS

■ Mounting Swivel Bracket

1. Secure the Swivel Ball to the base of the controller using the #10-32 screw.
2. Attach the swivel ball to the swivel bracket base using the provided screw.
3. Using the provided screw, secure the two clamps loosely together.
4. Place the clamps and screw around the 2 swivel balls. Tighten the clamp screw, thereby attaching the swivel bracket base to the full function controller.
5. Secure the Swivel Bracket to the rear of the controller (as shown in the diagram).
6. Place the unit against the intended mounting surface.
7. Mark the areas where the mounting holes will be drilled. If the mounting surface is part of the vehicle, make sure no vital components could be damaged by the drilling process.
8. Drill two mounting holes on the mounting surface, making sure no vital components of the surface are damaged.
9. Using customer provided screws, secure the Full Function controller to the mounting surface.

■ Mounting L-Bracket

1. Utilizing the provided screws, secure the L-Brackets to each sides of the controller using a Phillips head screwdriver at a torque setting of 1 in*lb.
2. Place the unit against the intended mounting surface and mark the areas where the mounting holes will be drilled. If the mounting surface is part of the vehicle, make sure no vital components could be damaged by the drilling process.
